## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This first Office Action is in response to Applicant's originally filed Application received in the Office on November 19, 2003 in this case.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by McCracken (5,816,554,). McCracken teaches each feature of the claimed invention as shown below.

**Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Funaro (6,029,937), in view of Zaremba et al. (5,577,344). Funaro teaches, substantially, each feature of the claimed invention as discussed above. Funaro does not teach multiple margin flanges formed on the top face near the end. Zaremba et al., however, teaches the claimed margin flanges. It would have been obvious to one of ordinary skill in the art at the time of invention to have modified Funaro's base to include Zaremba et al.'s margin flanges on the top face all the way around the boarder including the front end in order to contain excess water or soil.

### ***Prior Pertinent Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. '735 to Swanson; '098 to Washburn; and '746 to Johnson teach holders having a base and a column.
